Shivam Singh

Full Stack Developer

singh8375shivam@gmail.com | +91 83750 35675 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable SaaS, web, mobile, and AI-powered applications. Experienced in React.js, Next.js, React Native, Node.js, MongoDB, PostgreSQL, Redis, and AWS. Ships production features across authentication, payments, caching, and asynchronous processing, and uses LLMs, RAG, and AI-assisted development to deliver reliable products faster.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML, CSS
Frontend	React.js, Next.js, React Native, Redux Toolkit, Material UI, Tailwind CSS
Backend	Node.js, Express.js, NestJS
Databases	MongoDB, PostgreSQL, MySQL, Redis
AI / GenAI	LLMs, Generative AI, AI Agents, RAG, Embeddings, Vector Search, Prompt Engineering, Agentic Workflows, AI Automation
AI Tools	Claude, GitHub Copilot, Cursor, Antigravity
Cloud / DevOps	AWS, S3, EC2, Bedrock, Docker, Nginx, GitHub Actions, CI/CD
Integrations	Razorpay, Firebase
Security	JWT, RBAC

PROFESSIONAL EXPERIENCE

Full Stack Developer **July 2026 – Present**

Ritz Media World

- Develop and maintain mypropertyfact.in, a production real estate platform, with a Next.js and Material UI frontend.
- Built Property Create and Project Create modules with Material UI forms, validation, media uploads, and structured data handling.
- Improved listing and admin performance through pagination, faster API responses, and corrected filtering logic.
- Automated project creation by parsing Word documents with Mammoth.js, reducing manual data entry.
- Collaborated on REST API design, database schema updates, and role-based access for admin workflows.

Full Stack Developer **Sept 2025 – June 2026**

Uproi Digital

- Developed scalable web modules with React.js, Node.js, and Express.js, improving modularity and maintainability.
- Built reusable UI components and integrated REST APIs for consistent frontend–backend data flow.
- Designed MongoDB and MySQL schemas and CRUD operations that improved data consistency across modules.
- Shipped a React Native inventory app for real-time stock tracking, duplicate detection, and operational reporting.
- Worked in Agile sprints, managed code with Git, and contributed to peer code reviews.

Full Stack Developer **Aug 2024 – Sept 2025**

Sourcery IT

- Built a college-listing platform with a Next.js frontend and NestJS admin APIs.
- Developed modular backend services, documented them with Swagger, and secured them with JWT authentication and RBAC.
- Integrated AWS S3 for file storage and structured logging with Winston.
- Optimized database schemas and indexed queries, improving API response efficiency across modules.
- Mentored interns and junior developers through code reviews, API integration, and debugging.

PROJECTS

Stelo — EdTech Marketplace

React Native | Node.js | MongoDB | Redis | BullMQ | Razorpay

- Built a multi-role marketplace for students, toppers, and administrators.
- Developed notes upload, verification, purchase, learning, and monetization workflows.
- Implemented RBAC, admin modules, Razorpay payments, Redis caching, and BullMQ processing.
- Improved API performance by 30–40% through caching and asynchronous processing.

My Property Fact — Real Estate Platform

Next.js | Material UI | Tailwind CSS | Java | Spring Boot | MySQL | Mammoth.js | mypropertyfact.in

- Built and maintained a production platform for property listings, project showcases, and admin management.
- Developed admin and listing interfaces with Material UI and Tailwind CSS, including create flows, filters, and dashboards.
- Tuned API responses and pagination, and added document-based auto-fill for project creation using Mammoth.js.

Admission DIY — College Management Platform

Next.js | NestJS | Redis | PostgreSQL

- Built a full-stack college platform with SEO-optimized pages and a multi-role admin panel.
- Implemented JWT/OTP authentication and RBAC for 5+ user roles, with Swagger-documented NestJS services.
- Optimized PostgreSQL schemas and indexed queries, reducing API response time by about 30–40%, and used SSR and ISR to improve page load.

AxelATS — Hiring Platform

React.js | Node.js | Express.js | MongoDB | MySQL | Material UI | Tailwind CSS

- Built role-based dashboards for super admin, company admin, team admin, and employees, with data isolation across organizations.
- Implemented JWT authentication and modular REST APIs, and optimized MongoDB schemas for hiring workflows.

EDUCATION

Master of Computer Applications (MCA) **Aug 2024 – July 2026**

Chandigarh University
